Incident Prefill

Using Incident Prefill in PL Rating gives your agency the competitive advantage of knowing driving history without the expense of running an MVR at the end of the sales process. Incident Prefill helps to provide more accurate quotes, saving your agency time and money while fostering client relationships.

Features you need

- **Efficient & Effective:** When quoting auto insurance, Incident Prefill ensures accurate quotes, saves time by reducing keystrokes, prevents duplicate data entry and provides the opportunity to validate a client's driving history seamlessly within the PL Rating workflow. Avoid MVR chargebacks from carriers by using a capability that auto-populates driving history, helping you avoid timely data requests and passing additional costs along to your customers.

- **Reduce Costs:** For agents, time is money. Agents need to quote personal lines quickly and accurately to maximize profits. Incident Prefill seamlessly integrates with PL Rating workflow saving agents time and money by reducing data entry and MVR chargebacks.

- **Build Trust:** Incident Prefill builds trust by automatically pulling in information. Eliminate the need to ask for sensitive information over the phone and provide a seamless experience for the client. Making it easier than ever to guide customer conversation and validate customer driving activity before submitting to a carrier, ensuring accurate rates at the point of sale.

Some customers have seen potential for

Auto-populates driving history, improving accuracy without having to charge a price to the consumer after getting MVR data from a carrier and **reducing quote time by 50%.**
